About Me

I'm a third-year AI/ML undergrad at IIT Guwahati who knows his way around the full stack. I pick up new tools fast, prefer understanding things deeply over just getting them working, and enjoy working at the intersection of web development and AI.

Education

Indian Institute of Technology, Guwahati	2023 – Present
B.Sc. (Hons) in Artificial Intelligence and Machine Learning	
Cotton University	2022
Higher Secondary (Class 12) – 78%	

Skills

Full Stack Development: MERN, Next.js, FastAPI, PostgreSQL, Redis, Tailwind CSS

Programming: JavaScript, TypeScript, Python

AI / ML: RAG Pipelines, sentence-transformers, ChromaDB, LLM integration

More Skills: Git, Vercel, Railway, Excel

Projects

AlphaDesk — Full-stack financial research platform with RAG	Live Demo GitHub
- AI-powered financial research platform where users query BSE India, NSE India, and SEC EDGAR annual reports via natural language and get grounded answers with page-level citations. - Built with Next.js 14, FastAPI, ChromaDB, PostgreSQL, and NextAuth.js using a full RAG pipeline with sentence-transformers and switchable LLM backends (Groq, Gemini, Claude).	
NoteFlow — Full-stack writing and publishing platform	Live Demo GitHub
- Full-stack block-based document editor and publishing platform with 15+ block types, debounced autosave, and Cloudinary image upload. - Built with Next.js, TypeScript, Express.js, MongoDB, Tailwind CSS, and NextAuth.js (Google, GitHub, and email/password auth).	
CRM Application Backend	GitHub
- RESTful API for managing users, tickets, and comments with JWT-based authentication and role-based access control. - Built with Node.js, Express.js, MongoDB, and Redis caching to reduce database load.
